National Cyber Incident Response Plan

Interim Version, September 2010

STATEMENTS & RELEASES

The White House
Office of the Press Secretary

For Immediate Release

February 09, 2016

FACT SHEET: Cybersecurity National Action Plan

Taking bold actions to protect Americans in today's digital world.

From the beginning of his Administration, the President has made it clear that cybersecurity is one of the most important challenges we face as a Nation, and for more than seven years he has acted comprehensively to confront that challenge. Working together with Congress, we took another step forward in this effort in December with the passage of the Cybersecurity Act of 2015, which provides important tools necessary to strengthen the Nation's cybersecurity, particularly by making it easier for private companies to share cyber threat information with each other and the Government.

But the President believes that more must be done – so that citizens have the tools they need to protect themselves, companies can defend their operations and information, and the Government does its part to protect the American people and the information they entrust to us. That is why, today, the President is directing his Administration to implement a **Cybersecurity National Action Plan (CNAP)** that takes near-term actions and puts in place a long-term strategy to enhance cybersecurity awareness and protections, protect privacy, maintain public safety as well as economic and national security, and empower Americans to take better control of their digital security.

REPORT
114-32

CYBERSECURITY INFORMATION SHARING ACT OF 2015

APRIL 15, 2015.—Ordered to be printed

Mr. BURK, from the Select Committee on Intelligence,
submitted the following

R E P O R T

together with

ADDITIONAL VIEWS

(To accompany S. 754)

The Select Committee on Intelligence, having considered an original bill (S. 754) to improve cybersecurity in the United States through enhanced sharing of information about cybersecurity threats, and for other purposes, reports favorably thereon and recommends that the bill do pass.

BACKGROUND AND NEED FOR LEGISLATION

Over the last several years, the Committee has listened with increasing alarm to the testimony of senior intelligence officials and private sector experts about the growing cybersecurity threats to our nation.

The Committee has already seen the impact these threats are having on the nation's security and its economy as losses to consumers, businesses, and the government from cyber attacks, penetrations, and disruptions already total billions of dollars. Beyond direct monetary losses, the continuing efforts of foreign actors to steal intellectual property will have far reaching impacts on the innovation upon which a robust economy and strong military relies. The Committee has seen widespread theft through cyberspace increasingly evolve into disruptive and destructive attacks. American financial institutions have been subjected to denial of service attacks by foreign actors that blocked consumers' access to banking services. Critical infrastructure companies abroad and businesses
